As the smallest city in the Coachella Valley, Indian Wells has a lot going on with a significant investment in planning the long-term success of our community. In 2022, the City of Indian Wells will be completing its General Plan Update and the Indian Wells Golf Resort Master Plan. Both documents will help shape the entire City of Indian Wells and our municipal golf course for years to come. The City is also expected to break ground on improvements along the Whitewater Channel to facilitate future resort and retail development opportunities along Highway 111 and Miles Avenue. Other construction projects in the community includes the construction of 118 new homes by Lennar at the corner of Cook and Highway 111; development of a new park at the corner of Eldorado and Fairway; street re-pavement projects; multi-million-dollar energy efficiency and solar project at City Hall and the Indian Wells Golf Resort; and the initiation of a new affordable housing project. The City of Indian Wells is also excited about the return of the BNP Paribas in March, Indian Wells Art Festival in April, and Ironman and Pickleball in December 2022.

Chris Freeland, Indian Wells City Manager
